Maheshwara Medical College as Catalysts For Change in Society with Free PPE Program.

James Harley · August 14, 2020 · 3 minute read

At the event of Maheshwara free PPE KIT Program, Minister Harish Rao stated, “Maheshwara Medical College is Aspiring to every future Medical student, in their advancements and charity to the Society.”

Education is vital in shaping the nation’s future leaders and professionals. As students look for the best colleges and universities, they always consider the curriculum, state of the art facilities, and learning environment of the institution. As institutions continue to develop and expand their educational system and facilities, students tend to choose the institution that is geared towards molding their skills and abilities into becoming a globally competitive leader or professional.

In the medical industry, Maheshwara Medical College, a medical institution in India, has envisioned itself as the most prominent educational institution in molding the minds and sharpening the skills of the nation’s future industry professionals. Guided by its philosophy of promoting responsible medical practices and providing effective medical education, students in their vision of becoming globally competitive medical practitioners are developed around the institution’s commitment towards a world-class education. Maheshwara Medical College focuses on providing its students a strong commitment to education, a socially conscious learning environment, modern technologies and state-of-the-art facilities, and the ability to look to the future.

In its mission of providing a strong commitment to education, Maheshwara Medical College is driven by its research-focused

educational pedagogy. Students will develop overall thinking that is holistic and profound as shaped by research and teaching methodologies. Equipped with professors who value freedom and creativity, and are adaptable to diverse cultures and personalities, students are bound to be immersed in an effective learning environment.

As the institution exists in the service of the Indian population, it has been positioned as an *Integrated Health Care Campus*. Moreover, Maheshwara Medical College is committed to providing global standards of quality healthcare for the poor and the marginalized. This commitment is being fulfilled by its community members of administrative officers, teachers, students, and maintenance workers.

In realizing this vision is the existence of specialized social development organizations such as the Gender Harassment Committee and Anti-Ragging Committee. The Gender Harassment Committee seeks to promote gender equality within the campus while the Anti-Ragging Committee upholds the dignity and individuality of all students. These organizations ensure that students are developed within a socially conscious learning environment.

In their commitment to a world-class education, they provide the latest and modern technologies in the medical field of study. Students have access to state-of-the-art facilities and derive their learning from world-class faculty and staff. With such development and mastery, students will be able to provide relevant healthcare services to society.

Maheshwara Medical College prepares its students to be leaders and professionals of the future. It is by providing their commitment to quality education and accessible healthcare facilities that students are well equipped with the competency and skill set in time for the uncertainty of the future. Students finish their studies with gratitude and a heart to serve the Indian community. For one, the Maheshwara hospital is conducting medical camps in the neighboring thirty-six villages. It also adopted Chitkul Village by helping primary schools with their development financially.

Maheshwara Medical College is for the Indian community by creating an *Integrated Health Care Campus* that is of global standards to provide affordable healthcare services for the poor and needy. With responsible medical practices and effective medical education, they are molding students to become future doctors who are globally competitive and ready to serve the community.
